

Jigsaw with a bevel function on the sole part allows cutting angles of typically up to 45° relative to the normal vertical stroke for cutting mitre joints. Jigsaw also can cut in a rapid up and down motion. The key to excellent result with a jigsaw is to match a specific blade to the type of material that you'll cut: wood/metal/plastic

Model:

R5103A

Voltage:

230-240v

Frequency:

50-60Hz

**Input
Power:**
550w

**Rotation
Speed:**
2500-5000rpm

**Dimension
(mm):**
260x60x170

Weight:
2Kg
