

INDUSTRIAL VACUUM

Teesin designed a special cover for vacuum. This cover is absorbing sponge and can reduce the noise up to 20-30%

IVC-55 L

- IVC-55L comes with a patented cyclone technology. Above 92% of heavy dust particles are separated by the first filter, the remaining dust continue to the second filter, so it can ease the burden of the second filter.
- Using creative design to clean the 2nd filter effectively and efficiently, the machine can be operated continuously without the need to stop for cleaning the filters to achieve a constant high air flow. Hence, efficiency of dust absorption is guaranteed.

IVC-55L

Weight: 280kg
General Di-
men(mm):
1620x750x1840
Vacuum Type: Dry
Motor Qty: 1
Motor Power:
5500W

Tank Capacity:
By Bag
Suction Capacity:
30kpa
Air Flow (m^3/min /
cfm): 10/355
Power: 380V Three
Phase

IVC F-65L

Weight: 50kg
General Di-
men(mm):
490x650x1000
Vacuum Type: Dry
Motor Qty: 2
Motor Power:
100W

Tank Capacity:
65L
Suction Capacity:
200Mbar
Air Flow (m^3/min /
cfm): 6/213
Power: 220V Single
Phase
